DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/22/05 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Galie et al (Us Patent No 4,541,168).

Galie et al teach a method as claimed. The method comprises application of acetone, heating and rinsing as claimed. See entire document, especially column 3, line 45 – column 5, line 30.

4. Claims 1-7 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Saxena (US Patent NO 3,599,323).

Saxena teaches a method as claimed. The method comprises application of acetone, rinsing and heating as claimed. See entire document, especially column 1, line 66 – column 2, line 26 and claims 1 and 2.

Response to Arguments

5. Applicant's arguments with respect to claims 1-7 and 9 have been considered but are moot in view of the new ground(s) of rejection.

The applicants amended the claims and argue that the previously applied rejections are not proper. The amended claims are addressed above.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 5,516,725, 5,143,855, 4,033,788, 3,912,546, 3,940,847 are cited to show that treatment of doped surfaces with solvents as claimed followed by rinsing and heating as claimed was conventional in the art.
